

IAASB

Audits of Less Complex Entities - Webinars July 2019

The IAASB invites you to join one of three special webinars (English, French and Spanish) covering the recently released a Discussion Paper on [Exploring Possible Options to Address Challenges in Applying the ISAs in Audits of Less Complex Entities](#), which is open for comment until September 12, 2019. Through this consultation, the IAASB is looking to further understand the challenges in using the ISAs in audits of less complex entities, and views about possible actions to address the challenges.

In each webinar, the IAASB will take participants through the key aspects of the Discussion Paper. The webinars will not provide the opportunity for participants to ask any questions, however the IAASB welcomes any questions beforehand – if these could be submitted to beverleybahlmann@iaasb.org

Please feel free to share this e-mail

Note: the webinars will be recorded and made available on the IAASB website

About the IAASB

The objective of the IAASB is to serve the public interest by setting high-quality auditing, assurance, and other related standards and by facilitating the convergence of international and national auditing and assurance standards, thereby enhancing the quality and consistency of practice throughout the world and strengthening public confidence in the global auditing and assurance profession.

The IAASB develops auditing and assurance standards and guidance for use by all professional accountants under a shared standard-setting process involving the Public Interest Oversight Board, which oversees the activities of the IAASB, and the IAASB Consultative Advisory Group, which provides public interest input into the development of the standards and guidance. The structures and processes that support the operations of the IAASB are facilitated by the International Federation of Accountants (IFAC).
